

About Us

"Language is a process of free creation; its laws and principles are fixed, but the manner in which the principles of generation are used is free and infinitely varied. Even the interpretation and use of words involves a process of free creation." -Noam Chomsky.

That being said, Sunrise Languages' goal is to facilitate the language acquisition process for our students in such a way that developing effective communication skills in English is indeed the outcome. This is achieved through a communicative approach. It truly is the natural and only way.

Rigid text books and unproductive "methods," of the past, hinder the language acquisition process greatly, which is why our approach stands out from the rest, resulting in true linguistic progress!

At Sunrise Languages, each week is based on abundant themes to be discussed and discovered. Context is everything; Viable, familiar contexts to introduce vocabulary results in the increased involvement and enthusiasm of the students. Therefore, we incorporate hands-on activities and theme-based excursions to enhance the overall experience, making it a complete and truly unforgettable cultural experience.

Our approach is communicative, natural, and most effective.
